Managing Self Service Plug-ins

The JSS allows you to add the following plug-ins to Self Service to extend the functionality of the application:

- URL plug-ins that give end users quick, easy access to webpages
- Self Service Plug-in bundles allow end users to utilize plug-ins developed with the Self Service API
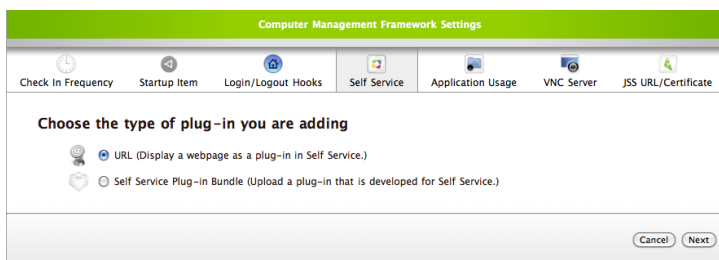

You can also use the JSS to edit URL plug-ins and remove both kinds of plug-ins from Self Service.

URL Plug-ins

URL plug-ins display web clips in the Self Service interface, allowing end users to access webpages without leaving the application.

To add a URL plug-in:

1. Log in to the JSS with a web browser.

2. Click the **Settings** tab.

3. Click the **Computer Management Framework Settings** link.

4. Click the **Self Service** tab.

5. Click the **Plug-ins** tab.

6. Click the **Add new plug-in** link.

7. Make sure the **URL** option is selected and then click **Next**.

8. In the **Display Name** field, enter a name of the webpage, such as "JAMF Software".

9. Enter a description in the **Description** field if desired.

10. Enter the URL of the webpage in the **URL** field. For example:

http://example.com

11. Use the **Priority pop-up** menu to specify the order in which the plug-in should be displayed in the Plug-ins list. For example, choose "1" to display the plug-in at the top of the list.

If you do not choose a priority, the plug-in is displayed in alphabetical order by display name.

12. To display an icon, click the **Upload icon** link. Click the **Choose File** button to select an icon and then click the **Upload Selected File** button to upload it.

13. Click the **OK** button, and then click **Save.**
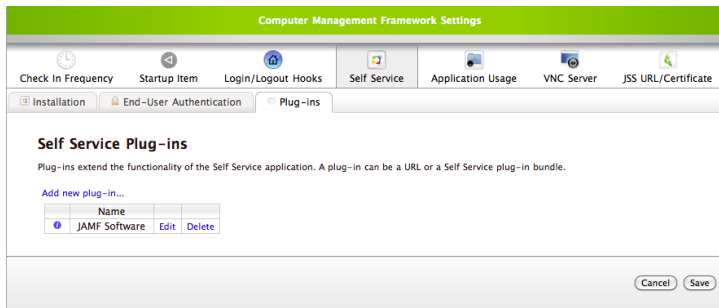

To edit a URL plug-in:

1. Log in to the JSS with a web browser.

2. Click the **Settings** tab.

3. Click the **Computer Management Framework Settings** link.

4. Click the **Self Service** tab.

5. Click the **Plug-ins** tab.

6. Click the **Edit** link across from the plug-in you want to edit and make the necessary changes.

7. Click the **OK** button, and then click **Save** for the changes to take effect.

To remove a URL plug-in:

1. Log in to the JSS with a web browser.

2. Click the **Settings** tab.

3. Click the **Computer Management Framework Settings** link.

4. Click the **Self Service** tab.

5. Click the **Plug-ins** tab.

6. Click the **Delete** link across from the plug-in you want to remove from Self Service.

7. Click the **Save** button.

Self Service Plug-in Bundles

The Self Service API allows developers to write their own plug-ins for Self Service. The Self Service API is available at:
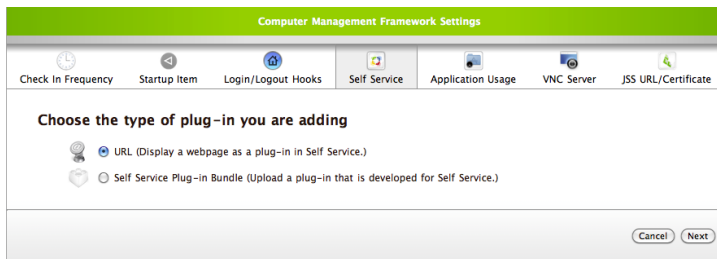

`Self Service.app/Contents/Resources/SSPluginProtocol.h`

The following instructions explain how to add and remove Self Service Plug-in bundles.
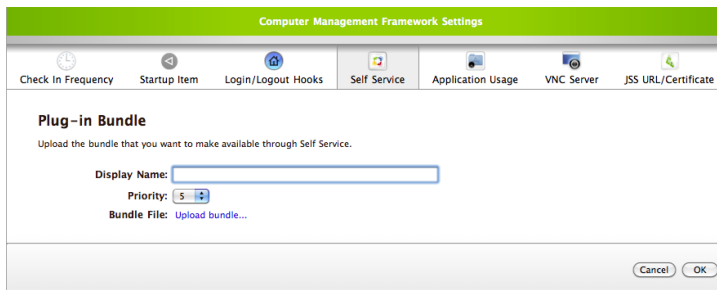

To add a Self Service Plug-in bundle:

1. Log in to the JSS with a web browser.

2. Click the **Settings** tab.

3. Click the **Computer Management Framework Settings** link.

4. Click the **Self Service** tab.

5. Click the **Plug-ins** tab.

6. Click the **Add new plug-in** link.

7. Select the **Self Service Plug-in Bundle** option and then click **Next**.

8. Enter a name in the **Display Name** field.

9. Use the **Priority pop-up** menu to specify the order in which the plug-in should be displayed in the Plug-ins list. For example, choose "1" to display the plug-in at the top of the list.

    If you do not choose a priority, the plug-in is displayed in alphabetical order by display name.

10. Click the **Upload Bundle** link.

11. Click the **Choose File** button and select a Self Service Plug-in bundle.

    This file must be a compressed `.bundle` file with a `.zip` file extension. For example:
    `ExamplePluginB.bundle.zip`

12. Click the **Upload Selected File** button.

13. Click the **OK** button, and then click **Save**.

    To remove a Self Service Plug-in bundle:

1. Log in to the JSS with a web browser.

2. Click the **Settings** tab.

3. Click the **Computer Management Framework Settings** link.

4. Click the **Self Service** tab.

5. Click the **Plug-ins** tab.

6. Click the **Delete** link across from the plug-in you want to remove.

7. Click the **Save** button.
